## Summary

- PHP Developer with 3+ years of professional experience, primarily using Laravel and CodeIgniter frameworks.
- Skilled in developing robust web applications with PHP, JavaScript, MySQL, HTML, CSS, and Bootstrap.
- Experienced in WordPress and Shopify development, including theme customization and feature integration.

Career aspiration is to prepare myself personally and professionally in a subject oriented field. Where I can get a scope to prove myself and show my best performances.

## Working Experience

### Junior Software Engineer || Net Planet Soft And Engineering

<https://netplanetsoft.com>

16th August, 2025 - Present

Developed multiple Laravel-based web applications, including government systems and ERP platforms for car and aircraft parts sales, featuring inventory management, reporting, and frontend product workflows.

#### Key Projects & Contributions:

- Worked on a government hotel management system, contributing to booking, management, and administrative features (<https://hotels.gov.bd>).
- Developed and maintained an ERP system for car parts sales, implementing inventory management features such as stock tracking, low-stock alerts, and product categorization. Built dynamic reporting modules with support for multiple export formats including Excel, CSV, and PDF.
- Contributed to the development of an ERP system for aircraft parts management and sales, handling inventory management, multi-format report generation, and frontend development for product listing and purchasing workflows.

## Software Engineer || Rigglotech

<https://rigglotech.com>

1st, November, 2024 – 15th August 2025

Designed and developed multiple web-based applications using PHP (Laravel), WordPress, and Shopify. Acted as a web development and hosting consultant, delivering scalable solutions for corporate, educational, and VoIP-based platforms.

### Key Projects:

- Corporate Website: <https://rigglotech.com>
- VoIP Community Forum: <https://voipforum.net>
- University Contact Management System: <https://academic.euniassist.com>
- VoIP Contact Management Software and other business applications developed using PHP (Laravel)
- Shopify E-commerce Store: <https://danla.co.uk>

## Junior Software Engineer || eNSPIRED ASIA

<https://www.enspiredasia.com>

22th March 2022 – 31th October 2024

### PHP Laravel Development

- Developed and maintained multiple PHP (Laravel)-based web applications, including business software and e-commerce platforms.
- Implemented role-based access control (RBAC) for secure user authentication and authorization across applications.
- Built a POS system with account management and comprehensive reporting features (<https://ibusiness.tigersdenltd.com>).

### WordPress Development

- Designed and developed WordPress websites for clients, creating custom themes and plugins to extend functionality and meet specific business needs (<https://tigersdenltd.com>).

### PHP CodeIgniter Development

- Developed and maintained PHP (CodeIgniter)-based web applications, including school management systems and blood management software.

### JavaScript & Frontend Development

- Utilized JavaScript to create dynamic, responsive, and interactive user interfaces.
- Implemented DataTables to build advanced, searchable, and interactive data tables.
- Integrated Summernote rich text editor for enhanced content creation and editing.
- Implemented Owl Carousel for responsive and touch-friendly sliders across multiple client projects.
